The Institutional Capacity Assessment Tool – ICAT – is an online self-assessment to help Siyaphumelela universities assess their strengths and areas for improvement in the seven key dimensions encompassed in the Institutional Capacity Framework shown below.

The assessment process asks a broad range of university stakeholders to assess their institution's capacity across four levels, from minimal to exemplary. Once an institution completes the assessment, the participants engage in a large group dialogue using the Institutional Capacity Framework. The discussion prompts the group members to celebrate strengths, prioritise areas for improvement, and identify concrete actions for building capacity to support student success efforts.

It will take about 60 minutes to complete the assessment. We recommend that you complete this assessment in one sitting. However, if you need to leave the assessment and come back later to finish, **your responses are automatically saved for seven days**. To enable this feature, you must use the same browser and enable cookies. When you click on the assessment link again, it will re-direct you to the page where you left off. After seven days, your partial response will be deleted.

Let's get started.
